Uber NCR Ride Operations

Where do bookings succeed, and where are they lost?

Showing: All vehicles

Total bookings	Completion rate	Revenue	Lost bookings
150K	62.0%	₹ 47.26M	57K

Seven vehicle types · Delhi NCR · January to December 2024

All vehicles

What you will find

Overview: The story in one screen
Demand: When people ride
Cancellations: Where bookings are lost, and why
Revenue: Where the money comes from
Vehicles: Seven types, one service level
Insights: Findings and caveats

About the data

150,000 bookings, January to December 2024.
Revenue counts completed rides only.
Repeated booking IDs are kept as separate rides.

Many results look identical across vehicles and months, so this dataset is probably synthetic. The findings describe this data, not Uber's real business.

Vehicle leaderboard

Auto	₹ 11.73M	24.8%
Go Mini	₹ 9.41M	19.9%
Go Sedan	₹ 8.54M	18.1%
Bike	₹ 7.14M	15.1%
Premier Sedan	₹ 5.73M	12.1%
eBike	₹ 3.30M	7.0%
Uber XL	₹ 1.41M	3.0%

What this means (2024, all vehicles)

62% of bookings become rides.

Drivers cancel almost 3x more often than customers.
About ₹24M of revenue is at risk from lost bookings.
Demand per day is steady all year.
Vehicles differ in volume, not in performance.

Vehicle comparison

Vehicle	Bookings	Completion	Avg fare	Avg km	Cust. rating	Driver rating	VTAT	CTAT
Auto	37,419	61.9%	₹ 506	26.0	4.40	4.23	8.5	30.0
Go Mini	29,806	62.2%	₹ 507	26.0	4.40	4.23	8.5	30.0
Go Sedan	27,141	61.4%	₹ 512	26.0	4.41	4.23	8.5	29.9
Bike	22,517	62.3%	₹ 509	26.0	4.40	4.23	8.6	30.1
Premier Sedan	18,111	62.1%	₹ 510	25.9	4.40	4.23	8.5	30.1
eBike	10,557	62.1%	₹ 503	26.3	4.40	4.23	8.5	30.0
Uber XL	4,449	62.6%	₹ 505	25.7	4.40	4.24	8.6	30.1

Completion varies by only 1.2 points and average fare by about ₹8.6. Volume differs a lot; performance does not.

Insights

What the data shows, what to try, and what to be careful about.

Key findings (2024, all vehicles)

62% of bookings became completed rides; 57,000 were lost.

72% of cancellations come from drivers: 18% of all bookings against 7% for customers.

₹24.4M of revenue is at risk if lost bookings paid the average fare (an estimate).

44% of customer cancellations cite driver behaviour.

18:00 is the peak hour, 9.4 times the quietest. 41% of bookings fall between 15:00 and 21:00.

2% is the gap between the busiest and quietest weekday. Bookings per day stay between 407 and 416 all year.

Every vehicle's completion rate is within **0.6** points of the fleet average (a **1.2**-point spread overall).

45% of revenue is UPI. Digital methods make up 75%.

0.006 is the correlation between fare and distance, so fares do not follow distance.

Recommendations (ideas to test)

1. Reduce driver cancellations first: they are the largest source of lost bookings.
2. Cut wrong-address cancellations with clearer pickup confirmation at booking.
3. Plan driver supply around 16:00 to 20:00, when demand peaks.

Definitions and data notes

Revenue: Completed rides only. Incomplete rides (₹4.59M) are excluded.
Lost bookings: Cancelled by customer or driver, no driver found, or incomplete (57,000).
Revenue at risk: An estimate: cancelled and no-driver bookings (48,000) multiplied by the average fare.
Repeated IDs: 1,233 booking IDs repeat on different rides. All rides are kept.
Synthetic data: Results are near-identical across vehicles, hours and months, so the findings describe this dataset, not Uber's real business.
